EDUCATION

ABESIT College of Engineering

BTech, CSE, CGPA: 8.5

Ghaziabad

Nov 2021 - Present

Sun Valley International School

12th, PCM, Percentage: 94,

Vaishali ,Ghaziabad

March 2020 - Apr 2021

Sun Valley International School

10th, Percentage: 92,

Vaishali ,Ghaziabad

March 2018 - Apr 2019

SKILLS

Category	Technologies
Frontend	JavaScript, ReactJS, Redux, NextJS, ReactJS
Backend	Node.js, Express.js
Database	MongoDB, MySQL, Appwrite, Firebase
Styling Frameworks	Tailwind CSS, MUI
Design Framework	Figma

WORK EXPERIENCE

NextGen

Web Developer Intern

Remote

March 2024 – May 2024

- Developed frontend and interactive UI features for GlycoMatrix, a bio-chemical website.
- Implemented innovative solutions to enhance user engagement and chemical data visualization .
- Collaborated closely with project teams to optimize frontend functionality and user experience design.

LUXRY

UI/UX Designer

Remote

Feb 2023 – Jun 2023

- Designed and developed the LUXRY Company's website using Figma, translating ideas into intuitive user interfaces.
- Worked efficiently under tight deadlines, delivering high-quality design deliverables.
- Developed wireframes, mockups, and interactive prototypes to demonstrate design ideas and gather feedback from stakeholders, resulting in a streamlined and user-friendly website interface.

PROJECTS

Expense Tracker (ReactJS, NextJs, TailwindCSS, DrizzleORM , Clerk)

[Live Preview](#) | [Github](#)

- Designed and developed using ReactJS and Next.js, leveraging their capabilities for creating a dynamic and responsive frontend.
- Employed TailwindCSS extensively to craft a visually appealing, modern, and user-friendly interface.
- Utilized Drizzle ORM to streamline data management, ensuring efficient handling and storage of financial information.
- Implemented Clerk for advanced user authentication and secure access management, enhancing application security.

Blog Master (ReactJS, Appwrite, Redux, Tailwind CSS)

[Live Preview](#) | [Github](#)

- Designed and developed using ReactJS, ensuring a dynamic and responsive frontend experience tailored for remote job listings.
- Integrated Appwrite to handle backend services such as authentication, database management, and storage solutions.
- Utilized Redux for comprehensive state management, facilitating seamless data flow and consistent application state across components.
- Employed Tailwind CSS extensively to create a modern, responsive user interface, enhancing user engagement.

CurrencyConverter (React Js, Tailwind CSS, API)

[Live Preview](#) | [Github](#)

- Developed using ReactJS to create a dynamic and interactive frontend for currency conversion.
- Utilized Tailwind CSS for a sleek, responsive, and user-friendly interface design.
- Integrated third-party APIs to provide real-time currency exchange rates and conversion functionality.

ACHIEVEMENTS AND ACTIVITIES

- Core Member of Google Developer Student Clubs**, designing and managing various developer events posts and workshops.
- Won first place in Code-a-thon 2.0 Hackathon** for exceptional coding and problem-solving skills.
- Organized Hacknovate 5.0**, a national-level hackathon with over 3500+ registrations.
